Advertising that works!

Traditional Advertising vs Restaurant Take out Menu Advertising

Unlike traditional forms of local advertising that can be costly with little return on investment, Restaurant take out menu advertising puts your dynamic ad in the hands of thousands of **LOYAL** restaurant customers who live in your immediate area. Every time a customer flips through their favorite restaurants menu to order, your ad will be right in front of them!

With traditional advertising, you can usually expect less than 5% return. Most people throw away mailers or other forms of traditional advertising before they even read them. With restaurant take out menu advertising, we estimate that more than **70%** of our menus will be saved. The reason why the menu's are saved is because most of the target audience are loyal customers of your host restaurant. That means that your ad will be viewed by thousands of people **over and over again**. We never feature direct competitors from the same business category. That means that you are advertising your business while simultaneously locking out your competitors.

Here is how it works:

- We pick a local, high volume (busy) restaurant with great customer reviews
- We create 25,000 17x11 professional full color glossy menu with 10 large ad's in the center flap.
- The restaurant owner agrees to give every customer a menu with their order.
- The ad will last for as long as it takes for the restaurant to distribute the menu's to their customers.
- Best of all, each ad only costs \$300 to appear in 25,000 menus (That's about penny per ad)
